

# CSA Certified Kernmantle Vertical Lifelines

---

[cancord.com/product/csa-certified-kernmantle-vertical-lifelines](https://cancord.com/product/csa-certified-kernmantle-vertical-lifelines)

Kernmantle ropes are manufactured with the load bearing fibers in the core, surrounded by a durable sheath to protect the inner core fibers from abrasion, dirt and harmful UV rays. Cancord can supply a CSA Certified Static Kernmantle Lifeline to meet your specific requirements. Listed below are some of the more common lengths and hardware configurations we sell. However, we can custom manufacture to your exact length and hardware requirements. Our turnaround time on custom orders is extremely fast – often same day or next day.
