

Communication Tower Rescue Training

This course will provide the learner with the required knowledge to perform a Communication Tower Rescue. Whether it be a Self-Supporting Tower, Monopole or even a Guyed Tower, we will show you the necessary skills needed to perform any rescue you may encounter. Each participant will be required to pass a written test with a minimum 75%, be familiar with all equipment, rigging and related equipment, and demonstrate their ability to perform a daily inspection. A complete understanding of the workings of the descent system must be demonstrated and the ability to instruct workers in the correct procedures using the descent system.

Prerequisite: Valid Standard First Aid Course and CPR & Valid Fall Protection Training (CPO Approved if applicable)

Topics Covered
